Place the applique over the basic fabric and pierce lightly with the felting needle tool. The fibers will become interlaced, attaching the motif to the fabric beautifully.

The brush-like mat enables smooth punching with little resistance, and allows the fibers of the applique to become well meshed with the basic fabric. The bristle length provides the ideal hardness and density for punching.

◆ Interlining

**Hot Melt Film(热烫胶膜)**

6408-1xxx

Thickness: 0.05mm/0.07mm/0.1mm, Width: 100~150cm

Handfeel: smooth bottom after degumming, better handfeel.

Colorfastness: able to endure high temperature(120℃), the color of cloth and thread stay the same after solution.

Strength: can completely meet strength needs of all bottom lining in embroidery industry, and can also differs thickness specification according to different stitch.

Degumming speed: will be completely melted and disappeared under temperature of 120℃ within 5~10 seconds.

Environment protection: no formaldehyde, nontoxic, dust-free, no side effect.

Application: suitable for high quality underwear and children wear's embroidery with the ability to resist high temperature(120℃).

**Hot Water Soluble Non-woven Film(高温水溶布)**

6407-0xxx

Weight: 25g/m, 40g/m, Width: 160cm, Packing: 320y/roll

Handfeel: good handfeel after solution in water, cloth's handfeel keep the same after solution.

Colorfastness: able to endure high temperature(95℃), the color of cloth and thread stay the same after solution.

Strength: can completely meet strength needs of all bottom lining in embroidery industry, and can also differs thickness specification according to different stitch.

Solution speed: completely soluble in water of 95℃ within one minute

Environment protection: nontoxic, no formaldehyde and environmentally friendly which are superior to regular embroidery paper.

Application: all kinds of chemical laces' bottom lining, cloths whose color and strength can endure temperature of 90℃, such as silk, microfiber and so on.

**Hot Melt Adhesive Film(热熔胶膜)**

6408-1xxx

Thickness: 0.1/0.12/0.15mm

Width: 47~48cm

Packing: 100y/roll

Specification: (SSPA)

Material: Nylon

Usage: embroidery, cloth adhesive, nylon adhesive.

Operation: firstly iron at 90℃~120℃ at the back of embroidery or cloth, then paste at 140℃~150℃.

Feature: convenience, resist rubbing and washing, no formaldehyde, nontoxic, environmentally friendly.

**Cold Water Soluble Film(冷水溶胶膜)**

6408-5xxx

Thickness: 25v/30v/35v, Width: 100cm, Packing: 100y/roll

Cold water soluble film which is under special process, is a kind of new pollute-free materials that can degraded by natural element (H₂O). It has the same and even better function as solar photocatalytic degraded and biodegraded materials because it can decompose and degrade into low molecule chemical compound by itself promptly, at the same time, it also has the function of improving soils. This product is suitable for industry, agriculture, fashion, chemical industry, embroidery, environment protection and some other fields.

Feature:

1. Low broken extension when embroidering.
2. Good strength and no needle broken will occur when embroidering.
3. Excellent melting and high melting speed, no stain in cloth.
4. No formaldehyde, nontoxic, non-pollution and environmental friendly.

Adhesive Fabric

7009-0091

Usage: Suits for most heavy and normal clothes, but suggest testing it on a small piece of cloth firstly, or checking the related instructions for ironing clothes. Cut the yarn which is over the repaired hole. Arrange the necessary adhesive part.

Cover one leftover fabric and put flatiron on cotton cloth. If the material is thick, put one piece of paper with same color under cloth for increasing heat.

Keep touch with fabric slowly and tightly for about 25 seconds. Don't burn out the cloth. Then cool it and make sure the edges are well connected.
